

## LAPTOP FIRE on the tray table

---

### Simulated circumstances

This scenario simulates the thermal-runaway of a laptop computer on a tray table during flight in day-light conditions.

### Objective

The objective is to adequately assess the situation and neutralize the fire in a team approach with an Attacker (A), Buddy (B) and Communicator (C).

### Fire trainer settings

Configure the fire trainer as below and select LAPTOP

Parameter	Value	Parameter	Value
Fire trainer mode	Automatic	Smoke	25%
Difficulty level	1	Relight timer	6 sec
Training time	2,5 min	Cabin sound	OFF
Lighting	100%	Burning smell	OFF

### Preparation

Required for this training exercise are:

- Laptop on the tray table
- 2 filled fire extinguishers
- Water-filled coffee can
- 2 PBE's (Protective Breathing Equipment)
- 2 pair of gloves
- 1 PED containment bag

### Special attention points

- Check if Buddy is standby with water-filled coffee can
- Check if glowing spot is cooled down properly
- Check if Buddy is standby with second fire extinguisher
- Check if laptop is removed (only when safe!) and stowed in a containment bag
