LUGGAGE BIN fire training exercise

Simulated circumstances
This scenario simulates a fire in an overhead luggage compartment.

Objective
The objective is to adequately assess the situation and neutralize the fire in a team approach with an Attacker (A), Buddy (B) and Communicator (C).

Fire trainer settings
Configure the fire trainer as follows and select Luggage bin

Parameter	Value	Parameter	Value
Fire trainer mode	Automatic	Smoke	25%
Difficulty level	1	Relight timer	n.a.
Training time	2,5 min	Cabin sound	OFF
Lighting	100%	Burning smell	OFF

Preparation
Required for this training exercise are:
- 2 filled fire extinguishers
- 2 PBE's (Protective Breathing Equipment)
- 2 pair of gloves

Special attention points
- Check if luggage bin is being examined for heat.
- Check if Buddy is standby with firefighting equipment.
- Check if luggage bin is opened by the Buddy only very slightly just enough to allow the Firefighter to insert the nozzle of the fire extinguisher.
